DETAILED ACTION

Priority

1. This application discloses and claims only subject matter disclosed in prior Application No. 09/769,033, filed January 24, 2001, now U.S. Patent No. 6,516,945, and names an inventor or inventors named in the prior application. Accordingly, this application may constitute a continuation or division. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

Applicant's claim for the benefit of a prior-filed application does not compile with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. [1].

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 19-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No.

6,516,945. Although the conflicting claims are not identical, they are not patentably distinct from each other because patent `945 claims a more specific embodiment than the instant application. Once the applicant has received a patent for a species or a more specific embodiment, he is not entitled to a patent for the generic or broader invention, because the more specific "anticipates" the broader. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).

4. Claims 19-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No.

6,675,963. Although the conflicting claims are not identical, they are not patentably distinct from each other because patent `963 claims a more specific embodiment than the instant application. Once the applicant has received a patent for a species or a more specific embodiment, he is not entitled to a patent for the generic or broader invention, because the more specific "anticipates" the broader. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).
